OBJECTIVE

To obtain a job leveraging my technical and creative skills in a video production environment.

EDUCATION

University of Georgia - Athens, GA

B.A. in Journalism/Telecommunication Arts, Production emphasis - 3.8 GPA
Presidential Scholar, Dean's List, Hope Scholarship recipient

RELEVANT WORK EXPERIENCE

LBF Studios (freelance) - Athens, GA: 2003-Present

Owner, operator, sole employee

Utilized underused professional video equipment to do consumer-level video production.
e.g. Converting old home movies or still photos to DVD, with fully interactive menu systems and client-selected soundtrack.

Last Second Design (freelance) - Athens, GA: 2002-Present

Web site designer, graphic artist, copy editor

Freelance web design, including graphical interface and advanced HTML template design.

Left Brain Films - Athens, GA: 2001-2003

Owner, operator

Involved in every aspect of local video production, including purchase and maintenance of professional video equipment.

Wrote, shot, and edited short films, including post-production effects and end-medium mastering.
Designed and administered web site and bulletin board.

Last Second Design - Atlanta, GA: 1999-2002

Co-owner, site designer, graphic designer/artist, customer liason

Designed server-side end of web sites on a contract, deadline-sensitive basis, working directly with customers to create templates for their copy.

Patricia's Spiritwear - Tucker, GA: 1998-1999

Technician, IT Systems Support, Computer Education

Taught co-owners weekly lessons on basic computer use and features of the Internet.

Maintained computers that drove 16-head embroidery machines, as well as clerical office computers.
Provided on-call general technical help with wiring new phones and setting up additional workstations.

Designed and administered company network, supervised physical cable and jack installation, and maintained network hardware.

Freelance Computer Assembly: 1996-Present

Accumulated knowledge of computer hardware through the assembly of countless computers from new or junk parts - for friends, relatives, and the occasional client.

Specializing in taking junk parts and recombining them into working machines, with operating systems varying from Windows 3.1 to obscure linux distributions.
